

a warmth for every season

EZEFOIL 240V

Description

The EZEFOIL product is the original product introduced to provide warmth under carpet and wood floors. The product was first introduced over 30 years ago. The product can be used with laminate, carpet, engineered wood and other floating floors. It can be installed quite simply under the flooring.

Product Construction

The heating cable is encased in reinforced aluminium foil and has a ground system built into the foil thereby ensuring no safety issues during or after installation. The products are approved by TUV Rheinland and America's UL (Underwriters Laboratories). Each heating mat is individually assembled and subjected to rigorous safety checks.

Heated Area	Wattage (W)	Amps
1.5m x 3m	675	2.8
1.8m X 3.4m	800	3.33
1.5m x 2.4m	540	2.25
0.7mx1.5m	160	0.66
1m2 up to 10m2	150w to 1500w	0.625 up to 6.25

Technical Specification

- Operating Voltage: 220-240V. 50Hz
- Cable thickness: 3mm
- Primary Cable Insulation: ETFE Fluoropolymer
- Power Output Rating: 160w per m2
- Power Lead: 3m long braided connection lead
- Lifetime warranty and no quibble guarantee.
